TWN. Innovative yacht building.

Since June 1, 2025, MFH Emden, NAZ Schepen, and DTB have joined forces and pooled their expertise. MFH has acquired 100% of the Dutch yacht building company NAZ Schepen and 50% of the Turkey-based production facility DTB. This merger has now given rise to TWN Yachting. The companies complement each other perfectly:

- **MFH-Emden** has specialized in the development and manufacture of complex GRP and composite components for marine and industrial applications since 1997 and expanded its portfolio in 2022 with the innovative TIDE yacht line.

- Since 2004, **NAZ-Schepen** has launched over 120 yachts from the Noordkaper and Wanderer series at its own DTB shipyard in Turkey.

TWN Yachting (Tide – Wanderer – Noordkaper) thus stands for high-quality sailing and motor yachts made of GRP and optionally aluminum (here in cooperation with our partner Yachtwerft Benjamins), individually manufactured and distributed internationally from its central location in Emden. The merger creates a comprehensive yacht builder that offers all services from sales, manufacturing, expansion, repairs, maintenance, and winter storage from a single source.

About MFH Emden

Since 1997, MFH Emden has specialized in the manufacture of complex GRP and composite components for special applications in offshore, aviation, and shipbuilding. Since 2022, MFH has been producing the innovative TIDE yacht line – designed by renowned designer Marc Oliver von Ahlen.

About NAZ-Schepen

Based near Harlingen (NL), NAZ-Schepen specializes in the sale of Noordkaper and Wanderer sailing yachts, which were designed by renowned designer Martin Bekebrede. These yachts are manufactured at the company's own production facility, DTB, in Turkey.

THE YACHT YOU DREAM OF
FOR A PRICE YOU HOPED FOR

TWN

Yachting

WANDERER45P

Certification	CE-A
Hull length	14,70 m
Waterline length	13,75 m
Width	4,40 m
Draft retractable keel	0,93-2,63 m
Weight	~ 14,5 ts
Sail area	127 m ²
Engine	from 44 KW +

>> TWN will begin mold construction for the new Wanderer45P project in 2025 and plans to start the first construction in 2026.
